Urgentem is proud and delighted to announce that **Element6™**, our climate-risk platform, was voted a winner of the 'Investment and Brightest Idea' Award at this year's Pensions & Investments 2020 World Pensions Summit.

Presented during the annual **World Pension Summit** conference, which was held virtually, the awards recognized industry leading innovations in communication and engagement; plan design; technology; and investment. The winners were decided by conference delegates.

Element6™ was voted a winner because it offers asset owners and asset managers an easy to use, intuitive platform that provides a holistic, science-aligned view of climate risks and opportunities at the company, sector and portfolio level.

Urgentem CEO Girish Narula commented, "This award validates our innovative products and analytics based on transparent methodologies using granular and quality assured dataset."
